Idaho State University | Alumni

Idaho State University

Kasiska Division of Health Sciences

Program Mission

The mission of the Idaho State University Master of Occupational Therapy Program is to prepare entry level clinicians competent to meet the diverse needs of people locally, nationally, and globally by upholding the standards of occupational therapy education. The program is committed to providing high quality student-centered innovative education, which is designed to develop autonomous practioners who are occupation-based and evidenced-based, leaders in the profession, and clinical scholars.
